Executive Summary

- » SMC Group continues to deliver significant strides in its sustainability initiatives to create a long-lasting impact on society at large and accelerate the transition towards a resilient and globally-competitive Philippines.
- Despite challenges such as typhoons and currency fluctuations, SMC's 9M24 consolidated revenues increased by 11% buoyed by higher sales volumes in its Power, Fuel & Oil, Food, and Spirits businesses. This was supported by the central bank's much-awaited easing of interest rates and favorable inflationary environment during the third quarter which stimulated economic activities specifically household spending.
- » SMC's consistent resiliency and adaptability, fueled further by enhanced operational efficiencies, increased productivity and marketing initiatives, allowed it to maintain margins, navigate the complex environment and continue to make headway against our sustainable goals and long-term strategies, both financially and operationally.
- We remain positive that the underlying strength of our businesses, coupled with easing inflationary pressures, will continue to support our consistent growth until year-end amid the impact of adverse weather conditions and volatile exchange rates.
